Boats which carry boilers and machinery are subject to inspection, and their outfit must be duly approved before they can carry passengers. But is it not just as important that a boat's timbers shall be able to bold together as that its boiler shall be sale? The wrecked barge of yesterday carried no boiler towing. But it carried great loads of precious freight. Why is it not important that regular inspections of such boats as to their strength and fitness and safety, shall be rigidly provided for?

FOOLISH WHIM OF ONE WOMAN.

A young and handsome woman of Buffalo has 'eft her wealthy husband and her luxurious home to become a chorus girl in a travelling opera company. Her departure has made a sensation in her own city, for also was what is known as a Augustus absenting deliy is toring with his work.

Obe, the speedy trotters and the speculative of wealth and fortune.

The woman has gone upon the stage with no expressed intention of "elevating." She has obeyed the dictates of a whimsical desire to go behind the footlights. "I will wear anything if I can join the company," was her response when the manager asked her if she would object to wearing tights.

One feels over such an act as this woman's a strange mixture of pity and impatience. With no possible chance of achieving fame or any other doubtful equivalent for what she has given up (for she is described as a woman of no extraordinary attainments, vocally or otherwise), this deluded wife has forsaken a true husband and his home for a toilsome life under a false glitter. There is but one hope in which those most closely interested in her welfare can join. That is, first, that an early realization of the falseness and footishness of her course with be brought to her very speedily through the wearing off of the glamour through which ane has seen the stage. Then, that she may return to contented wifenood in the place she should hold "dearest of all."
